### Quotes from Student Evaluations:

- Yang Yu is a great instructor. He makes this course much more interesting and useful. He is very patient and thoughtful to students when they face problems in the course. Yang can always figure out different ways to help us have a better understanding of the knowledge.
- I think this course is amazing. At first I had negative views because I thought that the class is online and it is difficult for the instructor to deliver instructions clearly, but Professor Yu did a good job. I would say I have a good understanding of microeconomics now and I am interested in learning more about economics.
- The professor was very accommodating and understanding for the change to online. Best out of all my professors.
- I'm not an economics major but I thought the course material was very interesting. The main focus of the class was solving different types of optimization problems which I found to be quite valuable since those types of problems appear frequently in my actual major of physics. That being said, students are expected to be comfortable with single variable and multi-variable calculus, so be prepared for lots of derivatives.
- The course materials are very helpful and detailed, and the practice problems are also very helpful for understanding the materials.
- I would like to rate this online course an A+.
- All the menus, tools and resources are well organized.
- I rate it a 9/10. Prof was very accomodating when I had trouble keeping up.
- Love this Prof. Would take him again in a heartbeat!
- He is a kindly and thoughtful instructor.
